Insulated copper braid X=400 mm L=424mm 630A

SOCOMEC insulated flat copper braids are mainly utilized for providing the power connections between series of distribution busbars and the upstream devices within an electrical panel.

Their flexibility is especially adapted to achieve complex and customized connections in cases where minimum spaceis available.

Strong points

- Easy setup
- Wide range of applications
- Compatibility

General characteristics

Tin-plated contact surface available Compact and flexible for ease of installation

Adapted to various types of connection terminals

Compatibility with any devices on the market

Compliance with standards

IEC UL
