## 97232010

## Remotely operated transfer switch ATyS UL1008 2P 100A

## Strong points

- Robust and Reliable design
- Maintenance-free
- Compatible with virtually any TSE controls

## General characteristics

Tested in full compliance with UL 1008 Three stable positions, not affected by voltage drops or vibrations Back to back switching design offering an extremely compact solution Make and break under load conditions Robust and reliable design with motor factory assembled on the transfer switch Compatible with virtually any TSE controller

Compliance with standards
UL 1008, Guide WPYV File 317092;
IEC 60947-6-1

ATyS non-automatic transfer switches are designed for use in total system optional standby applications for the safe transfer between a normal and an alternate power source.
The changeover is done in open transition and with minimum supply interruption during transfer ensuring full compliance with UL 1008. The ATyS is a full on-load disconnector where the main components are based on proven technology, also meeting requirements in UL 98 standard.
