## INOSYS 87P22081

800A UL 98B 1500VDC
INOSYS LBS is a range of load break switches that can be manually controlled. These switches
can be operated manually using the handle (manual version) to disconnect all or part of the
electrical installation. They ensure on-load opening / closing and safe disconnection of any direct current
electrical circuit up to 1500 VDC. They can also be used for emergency power switching applications. They are
tested and validated according to existing UL98B and IEC60947-3 standards.
