

DIRIS Digiware I

Current acquisition module

DIRIS Digiware I-3x DIRIS Digiware I-4x DIRIS Digiware I-6x

Configuration
with Easy Config System

Function

DIRIS Digiware I are DIN-rail mounted power monitoring modules. Associated with DIRIS Digiware U modules, they measure and monitor electrical parameters such as powers, energies and power quality of electrical installations.

The modularity, along with the RJ45 Digiware Bus provides a unique multi-circuit and scalable approach. Adding DIRIS Digiware I modules to the bus is done simply by clicking in an RJ45 cable. This allows great flexibility to users who wish to add more metering points in the future.

The RJ12 current inputs allow a quick and error-free connection to current sensors (TE, TR/ITR, TF) with automatic detection of the type and rating of the current sensors connected. This ensures reliable and accurate measurements at all times.

Advantages

Multi-circuit

- One module can monitor up to 2 three-phase circuits.
- Up to 31 current measurement modules can be added to the Digiware Bus, allowing to monitor a large number of circuits within the same DIRIS Digiware system.

Plug & Play

- RJ45 cables for a quick and easy connection of modules.
- Color-coded RJ12 cables to connect current sensors, quickly, safely and without errors.
- Load type, current sensor type and rating are automatically detected.
- When connected to ITR current sensors, the AutoCorrect technology detects and corrects wiring errors, making the system more reliable.

Accurate

- Compliant with standard IEC 61557-12, guaranteeing the quality and accuracy of measurements:
- class 0.5 from 2 - 120% In for the global measurement chain (including TE/ITR/TF current sensors)
- class 1 from 2 - 120% In for the global measurement chain (including TR current sensors)

Flexible

- Modules available in 3, 4 or 6 current sensor inputs.
- The types of current modules can be mixed within the Digiware system, to monitor a variety of single-phase, two-phase and three-phase circuits.

The solution for

- > Industry
- > Building
- > Infrastructure
- > Data center

Strong points

- > Multi-circuit
- > Plug & Play
- > Accurate
- > Flexible

Integrated technologies

PreciSense

AutoCorrect

VirtualMonitor

Accessories

Digiware plug-in connector

With the Digiware plug-in connector you can disconnect a DIRIS Digiware module from the Digiware bus while ensuring the DIRIS Digiware system continues to run downstream.

This accessory is particularly useful in applications with retractable drawers or critical applications such as data centers with busway systems.

Dimensions (in/mm)

DIRIS Digiware I-3x / I-6x

DIRIS Digiware I-4x

Current sensors

Various types of current sensors can be connected to the DIRIS Digiware I: Solid-core TE, split-core TR/TR, flexible TF current sensors. This range of sensors can be adapted to all types of new or existing installations. A rapid RJ12 connection makes wiring easy and reliable and prevents wiring errors. The DIRIS Digiware I meter module automatically recognizes the type of sensor used and its current rating. This guarantees the accuracy of the overall measurement chain (DIRIS Digiware I + current sensors).

For more information see "TE, TR and TF sensors" pages.

Technical Characteristics

Mechanical characteristics	
Mounting type	DIN-rail or back plate
Ingress Protection	IP20, front face

Measurement characteristics	
Current measurement	
Number of current inputs	I-3x: 3 / I-45: 4 / I-6x: 6
Associated current sensors	Solid-core TE, split-core TR/iTR, flexible TF current sensors
Connection type	Socomec RJ12 cables
Current measurement accuracy	Class 0.2 DIRIS Digiware I alone Class 0.5 with TE, iTR, TF sensors Class 1 with TR sensors

Power and Energy measurement	
Active Power/Energy accuracy	Class 0.2 DIRIS Digiware I alone Class 0.5 with TE, iTR, TF sensors Class 1 with TR sensors
Reactive Power accuracy	Class 1 with TE, iTR, TF sensors Class 2 with TR sensors
Reactive Energy accuracy	Class 2 with TE, TR/iTR, TF sensors

Digital inputs - DIRIS Digiware I-4x	
Number of digital inputs	2
Digital input type	Non-insulated input, internal polarization 12 VDC max, 1mA
Function	Logical status, pulse meter, multi-tariff
Connection	Removable screw terminal block, 4 positions, AWG 16 to AWG 26 / 0.2 to 1.5 mm ² stranded or solid cable

Digital outputs - DIRIS Digiware I-4x	
Number of digital outputs	2
Relay type	230 VAC ±15 % - 1 A 30 VDC - 3 A
Function	Manual command, alarm report
Connection	Removable screw terminal block, 4 positions, AWG 14 to AWG 24 / 0.2 to 2.5 mm ² stranded or solid cable

Communication characteristics	
Digiware Bus	
Connection type	Socomec RJ45 cable
Function	Proprietary bus connecting Digiware units
USB	
Connection type	USB Type Micro-B
Protocol	Modbus RTU over USB
Function	Firmware upgrade and configuration

Environmental characteristics	
Storage temperature	-4 to +158 °F / -20 to +70°C
Operating temperature	+14 to +158 °F / -10 to +70°C
Humidity	0% to 97% RH / +131°F/+55°C, non condensing
Operating altitude	≤ 6560 ft / 2000 m

Expert Services

Our service engineers are an essential part of our team, and they are dedicated to ensuring your power monitoring system provides accurate and reliable measurements to your EPMS software or SCADA system.

Our services include:

- > Site audits to verify the proper wiring of your system
- > Personnel training on how to configure, operate and maintain power monitoring equipment and associated software
- > Remote and on-site commissioning to ensure that your system is up and running quickly, with peace of mind.

For further information, please contact your nearest SOCOMEC branch.
